How to Succeed with Your EaseConnect+ Carrier Connections

Although your broker will handle the setup process for you, there are a few ways that you can help ensure these connections run smoothly.

Audit your employee data in Ease

Since Ease will now be the system of record with a carrier connection, it's important to verify that you have accurate and up-to-date information for your employees within Ease.

You will want to make sure the fields in the **personal profile**, **employment**, and **benefits** sections are accurate for each employee.

Ease is the system of record

When an EaseConnect+ carrier connection is established, Ease becomes the system of record between Ease and the insurance carrier. This means that any changes to employee information must be made in Ease.* You no longer need to log in to a carrier's system, as any changes made in Ease will automatically sync over to the carrier, saving you time and reducing errors.

If you have any additional questions, please contact your broker, or request more information by creating a ticket at help.ease.com.

*Many carrier portals lock down after Ease connections are established to ensure that all changes are made within Ease. If you do make a change directly with the carrier, this must be entered into Ease as well to avoid billing and enrollment discrepancies.
