

Seamless process with real-time updates

Enhanced experience for everyone

Guardian's benefit technology solutions make it easier to offer benefits to your employees. Through our API integrations with Ease, you will benefit from a modernized experience that saves time and eliminates frustration, allowing you to focus on other things. Our Evidence of Insurability (EOI) API connection streamlines the employee enrollment experience and makes managing the process easier for employers.

Here's how it works

EOI API streamlines the process for employees to complete the EOI questionnaire within the employee enrollment experience, which results in higher EOI completion rates. It also provides automatic updates to the employee and HR team. The result is a better overall experience for everyone.

Overcoming current challenges

Eliminates the challenges and frustrations within the evidence of insurability process.

Saving time and effort:

- Easier for employees to get the coverage they need.
- Employees receive an instant decision approximately 55% of the time.
- Employers no longer need to track down EOI status — saving up to 6 hours per month.*

Evidence of Insurability	Current experience		New experience with EOI API Connection
Completion rate**	40% completion rate		Average 75% completion rate
Status update	Employers need to track down EOI status		Employers receiving automatic EOI updates
Process flow	Frustration with disjointed enrollment process		Seamless process that allows employees to get the coverage they need

Key Benefits

Employer

No more chasing employees to complete EOI forms

Automatic updates to benefits and payroll deductions as underwriting decisions are made

Full visibility to status of each EOI without the need to follow up

Employee

One step enrollment process — no more paper

Instantaneous response if coverage request is approved or if additional review is needed

Get coverage they need without the hassle of a lengthy and convoluted paper-based process
