

Protection to help replace income in challenging times

Pays a portion of your salary after you have been ill or injured for an extended period of time

When you need to recover from an extended illness or injury, this benefit will start paying a portion of your salary after a certain period of time, typically after short-term disability payments end.

Only 48% of American adults indicate they have enough savings to cover 3 months of living expenses in the event they're not earning any income.²

What it does

Pays a portion of your salary, so you can cover your expenses while you're unable to perform your occupation. Check with your benefits representative for your company's specific plan details.¹

How it works

This benefit typically starts after short-term disability payments end, paying 60% of your income up until you recover or reach normal retirement age. There is often a maximum payment based on salary.¹

What it doesn't do

Provide payments that start immediately. Before this coverage begins, short-term disability will typically cover the first 13 to 26 weeks of payments. This benefit does not provide job protection.¹
