

Welcome to Ease!

Your insurance broker enrolled you into this training email series to help you quickly learn the ins and outs of Ease! Set yourself up for success by saving these emails so you can look back on the helpful video content if you need a refresher at any point.

The Ease Mobile App: Access Benefits from Anywhere

Your benefits should be mobile, just like your employees. With the Ease iOS and Android mobile app, your employees will have the ability to access their benefits information on-the-go. The mobile app allows employees to:

- Add primary and dependents' insurance cards to the app, so they never have to carry physical cards again.
- View their benefits summary, read plan information, and access policy numbers directly in the app.

The Ease mobile app is free to download in the [App Store](#) or on [Google Play](#).

Share the Flyer

P.S. — Be on the lookout for next week's email which will help you get organized by covering reports and how to add and manage company documents in Ease.
